PROJECTS

SIMPLE CHAT APP

- A simple chat app is a web-based application where anyone can chat in real-time. It was created using ReactJS and Socket.io, a web socket framework.
- Link: <https://buseph-simplechatapp.netlify.app>

WEB-BASED GUIDANCE COUNSELING

- "Web-based counseling" where users can request a schedule for counseling and have real-time communication with the counselor via video call. The web app was created using ReactJS, ExpressJS for the API, and Simple-peer for the WebRTC feature.
